

5 Courses

**Hands-on Introduction to
Linux Commands and Shell
Scripting**

**Databases and SQL for Data
Science with Python**

**ETL and Data Pipelines with
Shell, Airflow and Kafka**

**Data Warehouse
Fundamentals**

**BI Dashboards with IBM
Cognos Analytics and Google
Looker**

Jul 4, 2024

Hoan Ngo

has successfully completed the online, non-credit Specialization

BI Foundations with SQL, ETL and Data Warehousing

After completing this professional certificate, you be ready for an entry-level BI analyst role. You'll understand relational database concepts, can create cloud-based relational databases, execute SQL statements, and access databases using SQL and Python. You'll be able to create shell scripts with common Linux/UNIX commands, crucial for data preparation tasks. You can build batch and streaming ETL and ELT data pipelines using Bash, Apache Airflow, and Kafka. Additionally, you can design, model, and implement a data warehouse and analyze its data using BI tools like IBM Cognos, showcasing your business intelligence and related data engineering capabilities.
