

Cong Hoan Ngo

DATA ENGINEER | SOFTWARE ENGINEER

Hanoi, Vietnam

✉ conghoan.0406@gmail.com | 📱 hwanngo | 🌐 hwanngo

Building data pipelines and analytics systems for business decisions.

Summary

Data Engineer with 7+ years in IT, including nearly 3 years focused on data engineering. Experienced in building and operating cloud data pipelines, warehouse models, and analytics workflows using Python, SQL, Apache Airflow, dbt, Snowflake, and BigQuery across AWS, GCP, and Azure. Brings a strong software engineering foundation to improve pipeline reliability, speed up reporting, and deliver trusted data for decision-making.

Skills

Programming	Python, SQL, Java
Data Engineering	ETL/ELT, data modeling, Apache Airflow, dbt, Airbyte, workflow orchestration, data quality
Databases & Warehousing	Snowflake, BigQuery, PostgreSQL, MySQL, SAP HANA, SQLite
Cloud & Infrastructure	AWS, GCP, Azure, Terraform, Kubernetes, Helm, CI/CD
BI & Analytics	Metabase, Tableau, dashboarding, ad-hoc analysis
Practices & Automation	Observability, analytics engineering, workflow automation, human-in-the-loop review
Languages	English - C2 Proficient (CEFR)

Work Experience

Pod Co.

United States

Data Engineer

Apr 2025 – Present

- Built and operated ETL/ELT pipelines across Wholesale, B2B, and Distribution Platform domains using Apache Airflow and Airbyte.
- Developed SQL-based data models and Metabase dashboards to support business, finance, and sales teams in daily operational and strategic decision-making.
- Designed and implemented trend detection and brand monitoring workflows using social data crawling, keyword analysis, and aggregation to identify emerging market signals.
- Delivered analytics solutions to improve visibility into product performance, sales trends, and distribution metrics for internal stakeholders.
- Maintained and enhanced internal analytics systems and data workflows to ensure reliability and consistency of reporting outputs.

VMO Holdings Technology JSC

Vietnam

Data Engineer

Dec 2023 – Apr 2025

- Migrated legacy cron pipelines to Apache Airflow, improving scheduling, monitoring, and maintainability.
- Built ETL workflows for multi-source healthcare and pharmaceutical datasets across lake and warehouse environments.
- Supported critical data source migrations while preserving data integrity and downstream compatibility.
- Improved pipeline reliability and reconciliation processes that enabled analytics delivery for 200+ recurring reports.
- Partnered with analytics teams to investigate data discrepancies and deliver Tableau dashboards for business users.

Maxflow R&D Co. Ltd.

Vietnam

Software Engineer / Full-stack Developer

Jan 2021 – Dec 2023

- Developed core features for an industrial simulation and analytics platform with configurable workflows.
- Re-architected backend services from Flask servers to serverless AWS components, reducing infrastructure cost by approximately 25%.
- Implemented simulation modules for distance, energy, wear, and lifecycle cost analysis across 100+ modeled scenarios.
- Built data preparation and feature extraction pipelines for predictive maintenance experiments.

FPT Information System Corp.

Vietnam

Back-end Developer

Dec 2019 – Dec 2020

- Built backend services for a national public procurement platform in a 5-engineer team environment.
- Contributed to Angular-based front-end improvements, reducing average page load time by approximately 20%.

House3D Co. Ltd.

Web Developer

Vietnam

Feb 2019 – Dec 2019

- Developed and maintained customer-facing web features for an interior design technology platform.

Framgia Inc. / Sun* Inc.

Web Developer Intern

Vietnam

Jun 2018 – Sep 2018

- Completed Ruby on Rails training and built an e-commerce web project in a 3-member team with payment gateway integrations (PayPal, BaoKim, NganLuong).

Projects

Personal Project

HireFlow – Hiring Workflow Automation Platform

2025 – Present

- Built a personal hiring workflow automation system using FastAPI (backend) and Next.js (frontend), deployed for internal use.
- Developed pipelines for job description generation, candidate ingestion, and CV parsing across multiple submission sources.
- Implemented candidate ranking and workflow automation with AI-assisted components, combined with human review before shortlist decisions and communication steps.

Education

VNU – Hanoi University of Science

Bachelor's Degree in Computer Science and Information

Vietnam

2016 – 2021

- Coursework focus: Software Engineering, Database Systems, Data Structures and Algorithms.

Certifications

May 2025	IBM Data Architecture	IBM
Dec 2024	Google Associate Cloud Engineer	Google
Nov 2024	Google Advanced Data Analytics	Google
Jul 2024	IBM Data Engineering	IBM
Jun 2024	Microsoft Azure Data Engineering Associate	Microsoft
Jun 2024	AWS Cloud Solutions Architect	AWS

Honors & Awards

2024	Employee of the Year VMO Year-End Award	VMO Holdings
